PERSPECTIVES

A role for the glycemic index in preventing or treating diabetes? *JM Miles*
See corresponding articles on pages 114 and 126. **1**

Glycemic index in early type 2 diabetes. *X Pi-Sunyer*
See corresponding article on page 114. **3**

EDITORIAL

Fruit and vegetables: think variety, go ahead, eat!
SJ Padayatty and M Levine
See corresponding article on page 64. **5**

COMMENTARY

Are there specific treatments for the metabolic syndrome?
D Giugliano et al **8**

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders

Meal-induced compositional changes in blood and saliva in persons with bulimia nervosa. *AW Dynesen et al* **12**

Long-term effects of a high-protein weight-loss diet.
PM Clifton et al **23**

A prospective study of weight change and systemic inflammation over 9 y. *AW Fogarty et al* **30**

Dietary restraint and low bone mass in female adolescent endurance runners. *MT Barrack et al* **36**

Effects of a high-protein ketogenic diet on hunger, appetite, and weight loss in obese men feeding ad libitum.
AM Johnstone et al **44**

Lipids

Subcutaneous adipocyte size and body fat distribution.
YD Tchoukalova et al **56**

Cardiovascular disease risk

Plasma vitamin C concentrations predict risk of incident stroke over 10 y in 20 649 participants of the European Prospective Investigation into Cancer–Norfolk prospective population study. *PK Myint et al*
See corresponding editorial on page 5. **64**

A prospective community–population–registry–based cohort study of the association between betel–quid chewing and cardiovascular disease in men in Taiwan (KCIS no. 19).
AM-F Yen et al **70**

The effects of a whole grain–enriched hypocaloric diet on cardiovascular disease risk factors in men and women with metabolic syndrome. *HI Katcher et al* **79**

Nutritional status, dietary intake, and body composition

Molecular analysis of yogurt containing *Lactobacillus delbrueckii* subsp. *bulgaricus* and *Streptococcus thermophilus* in human intestinal microbiota.
R García-Albiach et al **91**

A low-glycemic-index diet reduces plasma plasminogen activator inhibitor-1 activity, but not tissue inhibitor of proteinases-1 or plasminogen activator inhibitor-1 protein, in overweight women. *L Jensen et al* **97**

Simplified nutritional screening tools for patients on maintenance hemodialysis. *K Yamada et al* **106**

Carbohydrate metabolism and diabetes

The Canadian Trial of Carbohydrates in Diabetes (CCD), a 1-y controlled trial of low-glycemic-index dietary carbohydrate in type 2 diabetes: no effect on glycated hemoglobin but reduction in C-reactive protein.
TMS Wolever et al
See corresponding perspectives on pages 1 and 3. **114**

Dietary glycemic index and glycemic load and the risk of type 2 diabetes in older adults. *NR Sahyoun et al*
See corresponding perspective on page 1 and related perspective on page 3. **126**

Energy and protein metabolism

Dietary fat oxidation as a function of body fat.
KR Westerterp et al **132**

Vitamins, minerals, and phytochemicals

Optimal vitamin D status attenuates the age-associated increase in systolic blood pressure in white Americans: results from the third National Health and Nutrition Examination Survey. *SE Judd et al* **136**

Oral administration of vitamin C decreases muscle mitochondrial biogenesis and hampers training-induced adaptations in endurance performance.
M-C Gomez-Cabrera et al **142**
